The background of the slide features a close-up, high-angle photograph of a complex electronic circuit board. The board is densely packed with various components, including integrated circuits, resistors, and capacitors. The lighting is dramatic, with some components highlighted in a warm, golden glow while others are in deep shadow, creating a sense of depth and technical precision. The overall color palette is dark, with the blue of the text and logo providing a strong contrast.

# ABOUT solace

Striving to keep quality top priority, Solace Controls design, develop and manufacture their products to assure reaching and maintaining international quality standards. After extensive research and testing, only top components are carefully chosen and ordered from around the globe to assemble one by one in Egypt, aiming to soon have all manufacturing done in Egypt with same international quality.

# WHO WE ARE

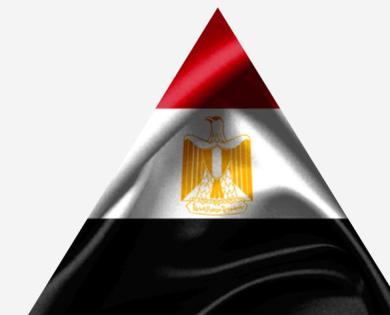

## MANUFACTURERS

We are manufacturers of all our products. This means we fine tune and single out the best components for our products to be assembled in our motherland.

## INTEGRATED & COMPATIBLE

Solace provides you with the full smart environmental experience, integrating with all smart products and offering all needed products, CCTV, security systems, and even a solar system!

## LOCAL

An Egyptian based brand. Not only does Solace design and manufacture locally, but have also chosen to partner with local businesses.

THE HEART OF IT ALL

# THE HUB

THE FIRST OF ITS KIND

**Geolocation**

**Push Notifications**

**Compatibility**

The Solace HUB is what we refer to as the brain. The HUB integrates all Solace products along with over 1500 third party brands. It is also the server and is installed locally on premisses providing higher level security and privacy.
